## VISTA Membership Update

### Overview

In order to take advantage of the improved Membership functionality offered in the latest VISTA product releases (versions 5.0.4.42 & 6.0.1.18) clients will first need to run the VISTA Membership Update. This easy to use tool will make the appropriate updates to the VISTA database, and provide users with access to the recent product enhancements.

### Technical Requirements

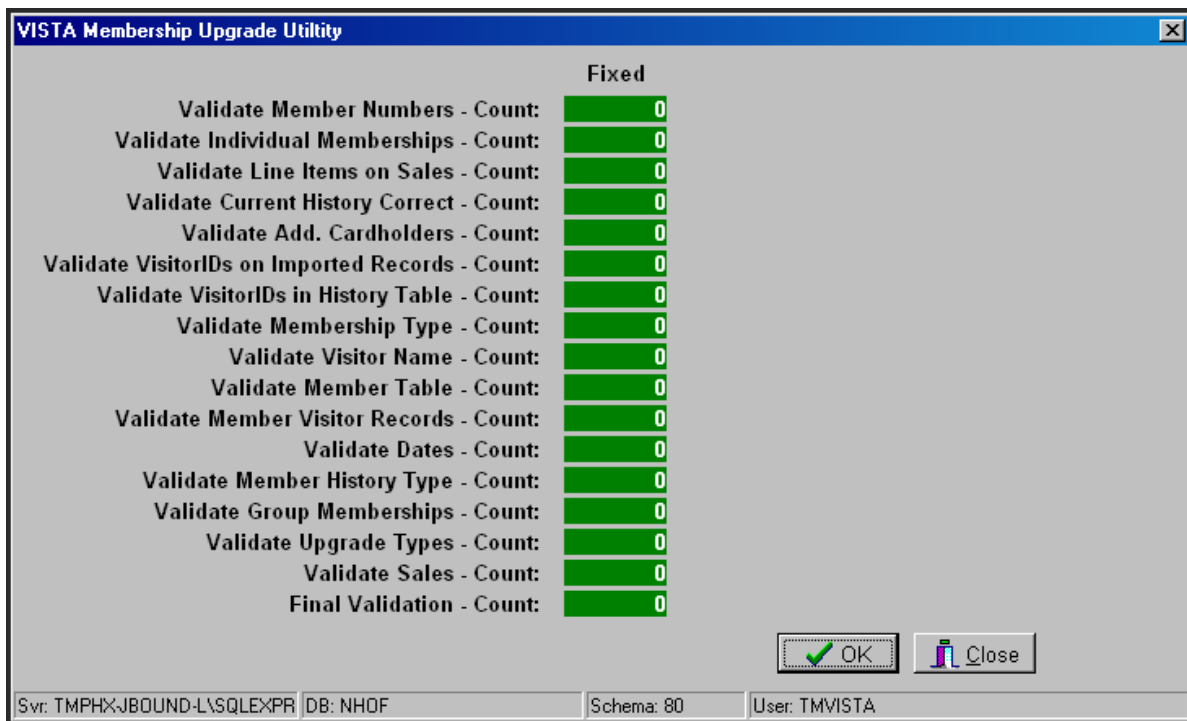

- This update is necessary only for those clients upgrading from releases prior to VISTA version 5.0.4.42, or 6.0.1.18
- The application needs to be run locally on the machine where the VISTA database is located.
- The user will also need to have VISTA administrator rights.

### Instructions

1. Double click MembershipUpdate.exe

2. Click OK on the Membership Update dialogue

## Instructions Continued

- The application will make the necessary updates to the database and display the results.

**VISTA Membership Upgrade Utility** [X]

Processing 2448 of 2448 records
